Cumberland County Census Tracts 2010

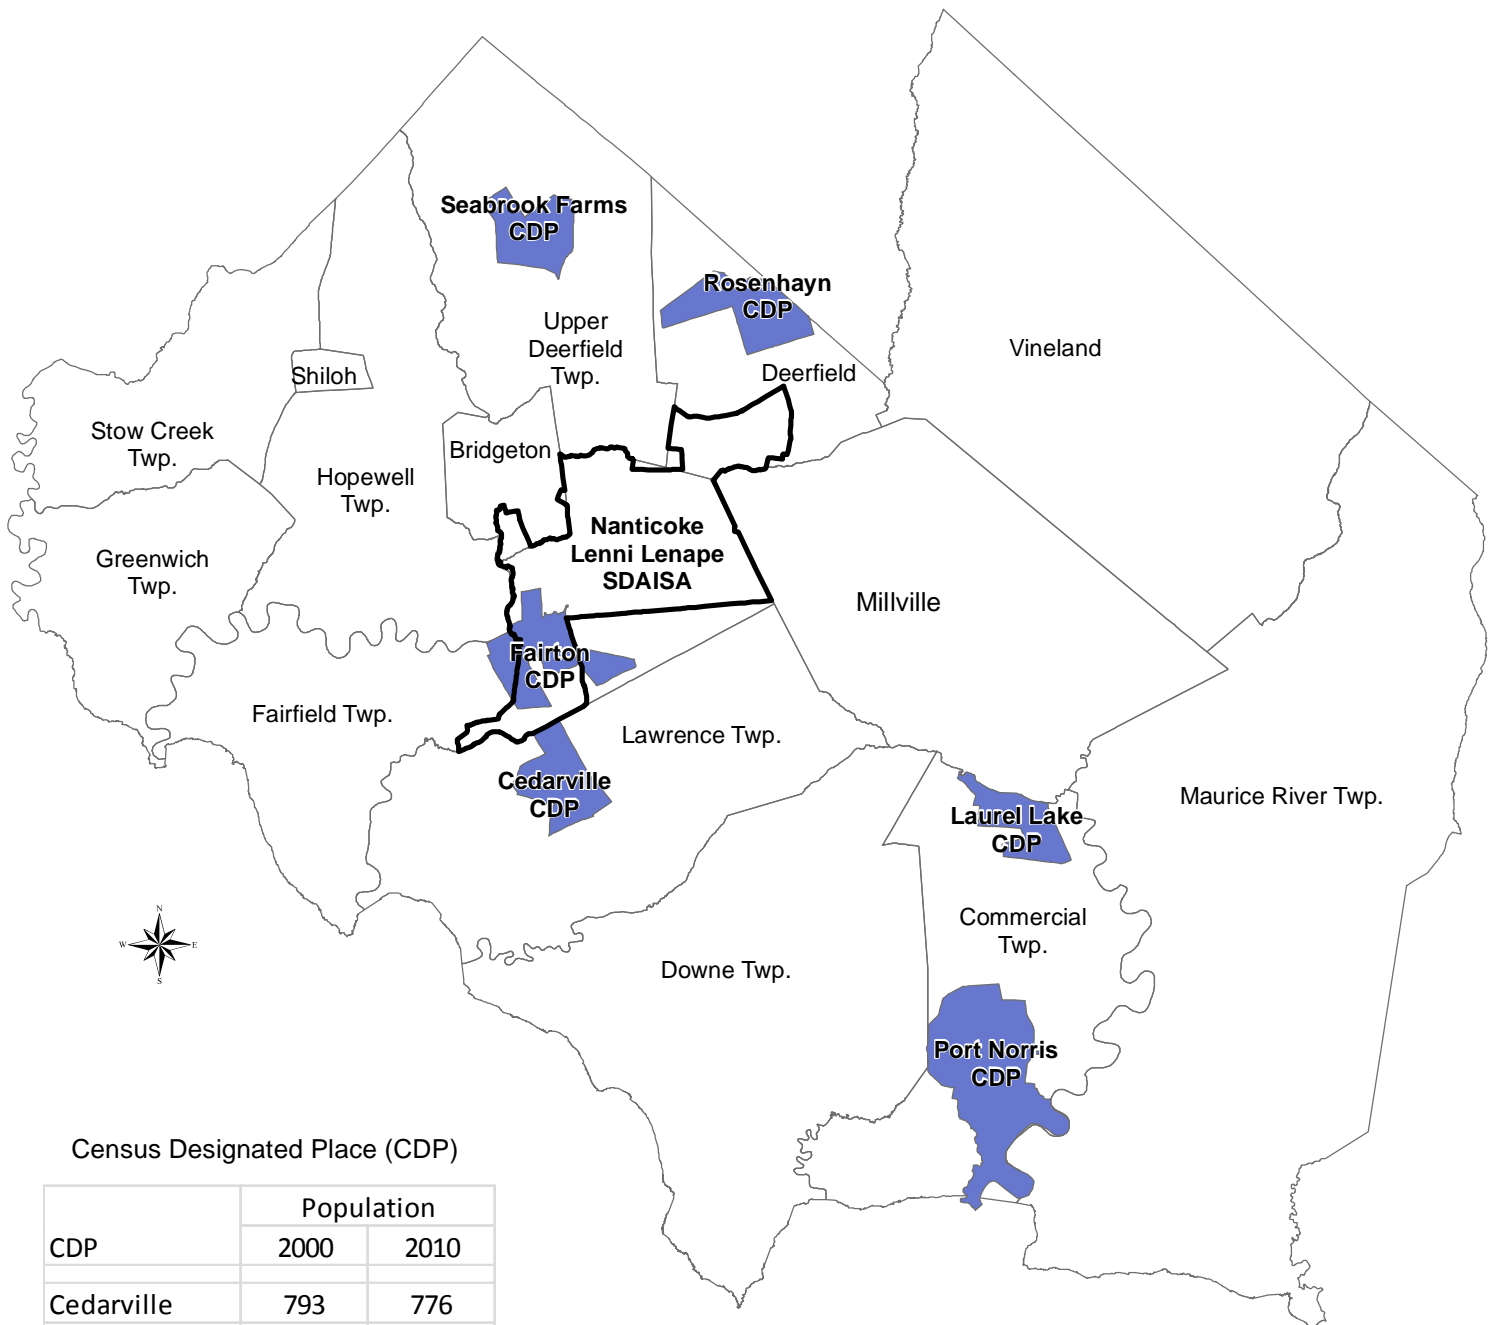

Municipality	Census Tract	2010 Population	Area in Sq. Miles
Bridgeton City - 6 Tracts	#201 - 205.03	25,349	6.22
Millville City - 6 Tracts	# 301 - 305.02	28,400	42.35
Vineland City - 10 Tracts	# 403 - 411	60,724	68.69
Commercial Township	# 102	5,178	32.46
Deerfield Township	# 108	3,119	16.84
Downe Township	# 103.02	1,585	50.76
Fairfield Township - 2 Tracts	# 104.01 & 104.02	6,295	42.29
Hopewell Twp. & Shiloh Borough	# 106	5,087	31.1
Greenwich & Stow Creek Twps.	# 105	2,235	36.61
Lawrence Township	# 103.01	3,290	37.47
Maurice River Twp. - 2 Tracts	#101.01 & 101.03	7,976	93.41
Upper Deerfield Township	# 107	7,660	31.1
Cumberland County	Total	156,898	489.3

Census Designated Place (CDP)

CDP	Population	
	2000	2010
Cedarville	793	776
Fairton	2,253*	1,264
Laurel Lake	2,929	2,989
Port Norris	1,507	1,377
Rosenhayn	1,099	1,098
Seabrook	1,719	1,484

*Includes the population from Federal Correctional Institution Fairton

Nanticoke Leni Lenape SDAISA	
Population	
2000	2010
12,316*	5,652**

*Includes the population from South Woods State Prison and Fairton FCI. **The boundaries were changed and the prison population was removed from this area

State Designated American Indian Statistical Area (SDAISA)

Census Tracts are small, relatively permanent statistical subdivisions of a county or equivalent entity that are updated by local participants prior to each decennial census as part of the Census Bureau's Participant Statistical Areas Program. The Census Bureau delineates census tracts in situations where no local participant existed or where state, local, or tribal governments declined to participate. The primary purpose of census tracts is to provide a stable set of geographic units for the presentation of statistical data.

Census tracts generally have a population size between 1,200 and 8,000 people, with an optimum size of 4,000 people. A census tract usually covers a contiguous area; however, the spatial size of census tracts varies widely depending on the density of settlement. Census tract boundaries are delineated with the intention of being maintained over a long time so that statistical comparisons can be made from census to census. Census tracts occasionally are split due to population growth or merged as a result of substantial population decline.

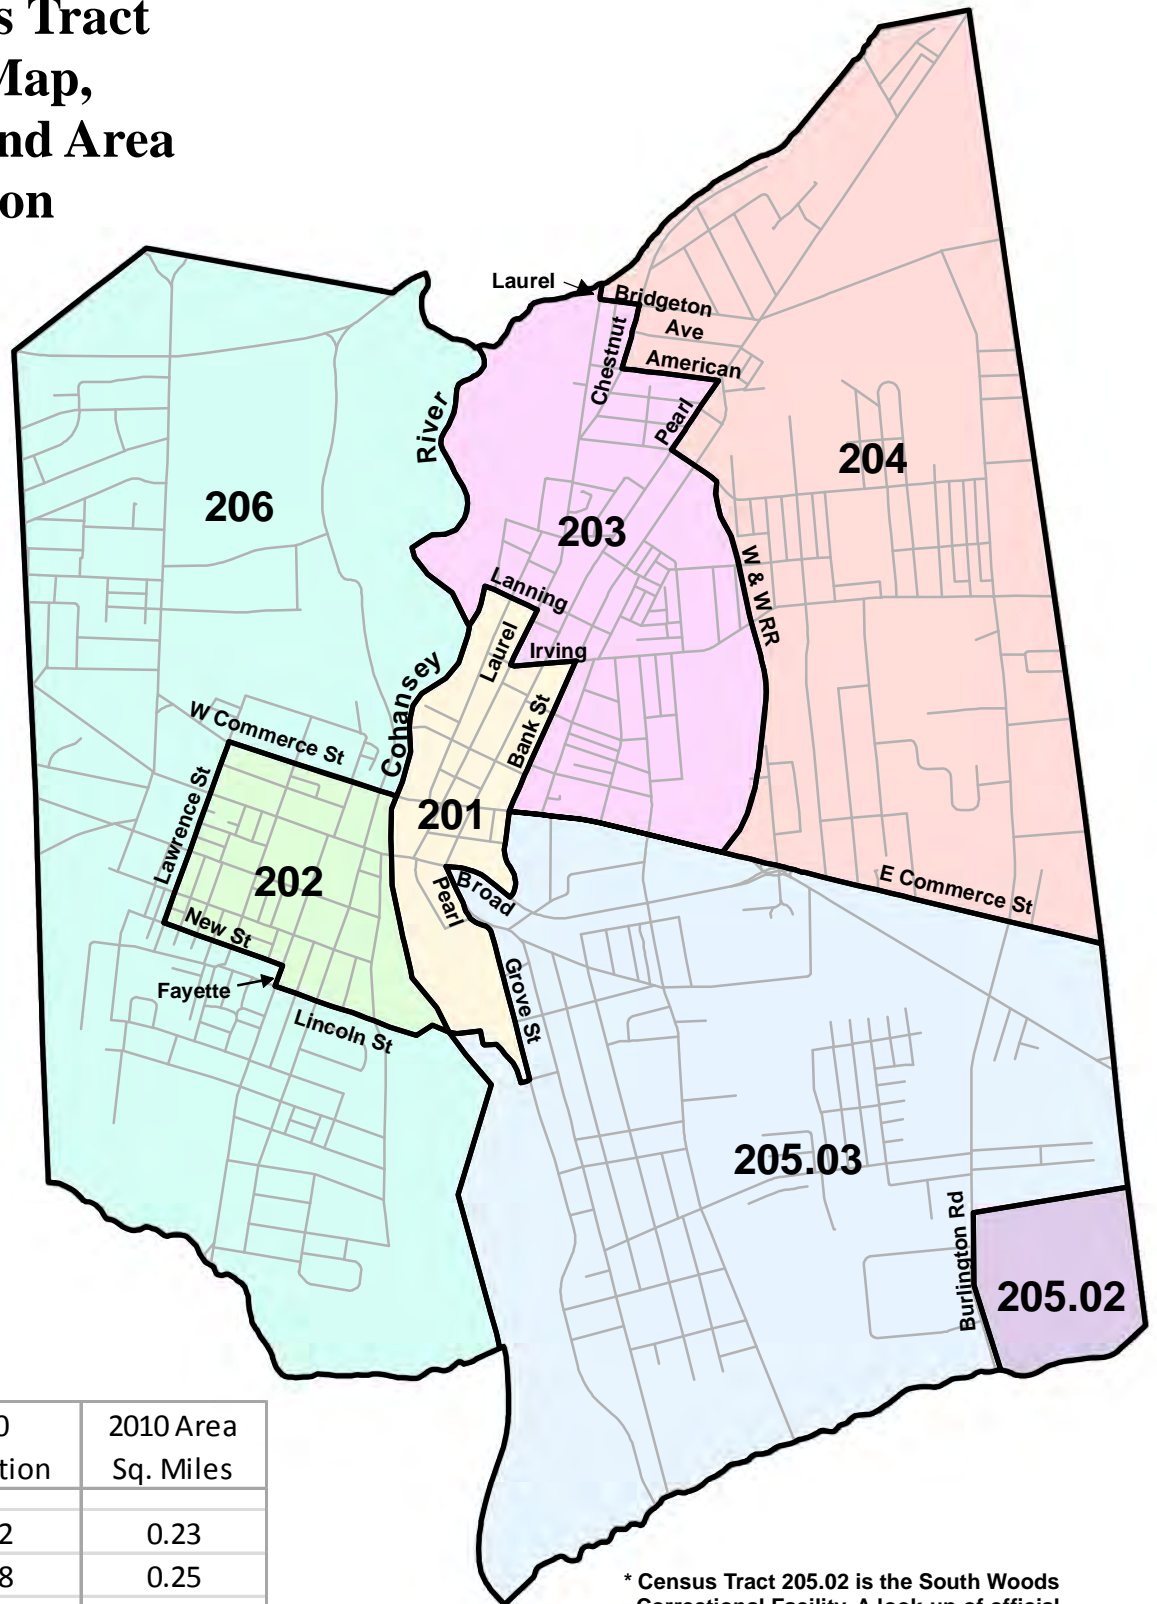

Census tract boundaries generally follow visible and identifiable features. They may follow nonvisible legal boundaries, such as minor civil division (MCD) or incorporated place boundaries in some states and situations, to allow for census-tract-to-governmental-unit relationships where the governmental boundaries tend to remain unchanged between censuses. State and county boundaries always are census tract boundaries in the standard census geographic hierarchy.

Blocks (Census Blocks) are statistical areas bounded by visible features, such as streets, roads, streams, and railroad tracks, and by nonvisible boundaries, such as selected property lines and city, township, school district, and county limits and short line-of-sight extensions of streets and roads. Generally, census blocks are small in area; for example, a block in a city bounded on all sides by streets. Census blocks in suburban and rural areas may be large, irregular, and bounded by a variety of features, such as roads, streams, and transmission lines. In remote areas, census blocks may encompass hundreds of square miles. Census blocks cover the entire territory of the United States, Puerto Rico, and the Island Areas. Census blocks nest within all other tabulated census geographic entities and are the basis for all tabulated data.

Block Groups (BGs) are statistical divisions of census tracts, are generally defined to contain between 600 and 3,000 people, and are used to present data and control block numbering. A block group consists of clusters of blocks within the same census tract that have the same first digit of their four-digit census block number. For example, blocks 3001, 3002, 3003, . . . , 3999 in census tract 1210.02 belong to BG 3 in that census tract. Most BGs were delineated by local participants in the Census Bureau's Participant Statistical Areas Program. The Census Bureau delineated BGs only where a local or tribal government declined to participate, and a regional organization or State Data Center was not available to participate.

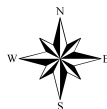

A BG usually covers a contiguous area. Each census tract contains at least one BG, and BGs are uniquely numbered within the census tract. Within the standard census geographic hierarchy, BGs never cross state, county, or census tract boundaries but may cross the boundaries of any other geographic entity.

2010 Census Tract Outline Map, Population and Area Bridgeton

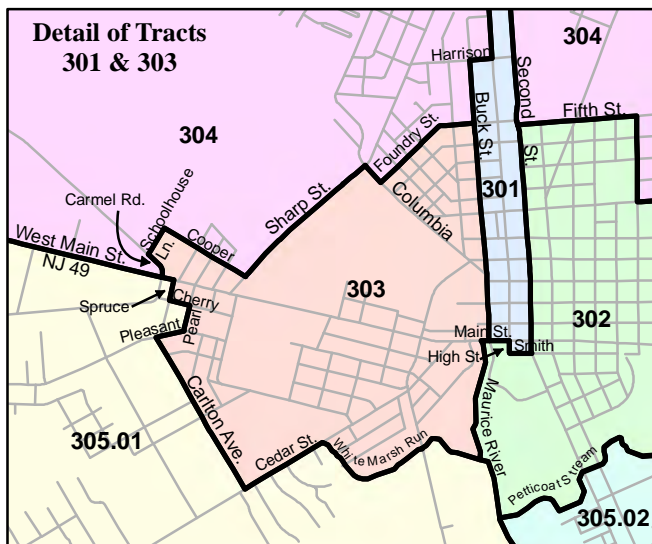

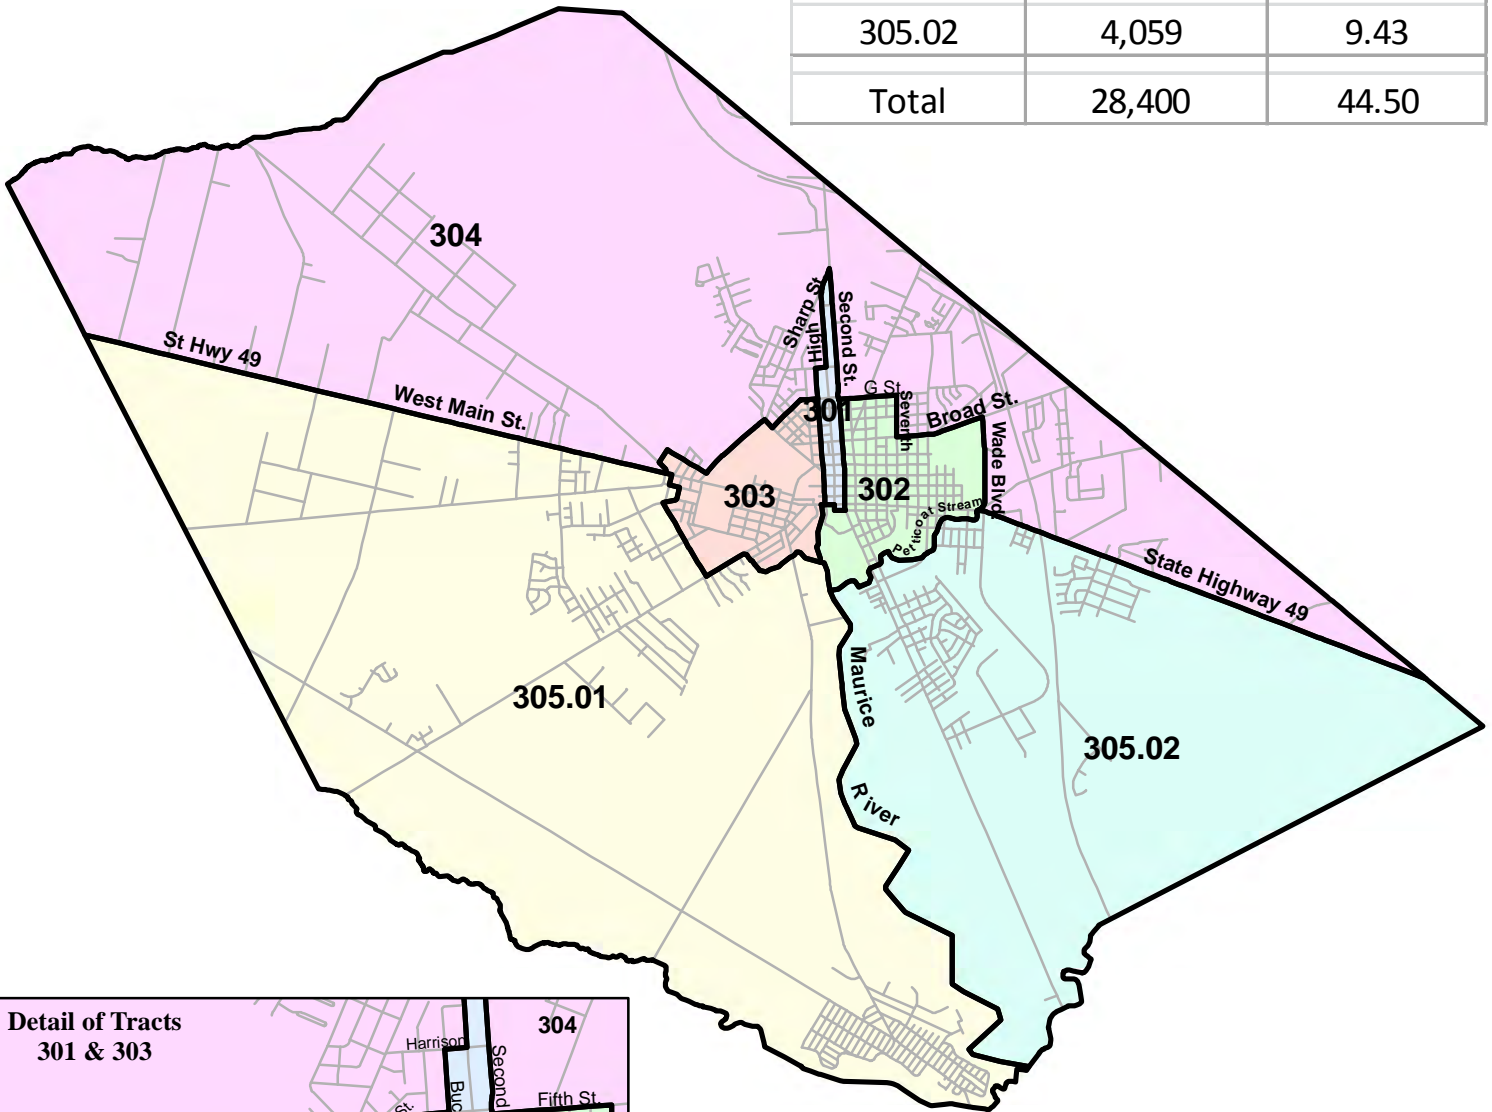

Census Tract	2010 Population	2010 Area Sq. Miles
201	1,222	0.23
202	3,168	0.25
203	6,804	0.65
204	2,830	1.43
205.02	3,342*	0.14
205.03	3,947	1.82
206	4,036	2.00
Total	25,349	6.52

* Census Tract 205.02 is the South Woods Correctional Facility. A look-up of official Census data will show that this tract has 0 population. The population was mistakenly placed in Census Tract 205.03. The population shown in the chart is the population in the prison as of April 1, 2010.
